

CLAIMS

1. An adhesive patch characterized by being formed by incorporating a sucrose fatty acid ester into an adhesive base.
2. The adhesive patch according to claim 1, formed by directly or indirectly extending and applying the adhesive base onto a backing.
3. The adhesive patch according to claim 1 or 2, wherein the sucrose fatty acid ester is one kind or two or more kinds selected from sucrose behenic acid ester, sucrose stearic acid ester, sucrose palmitic acid ester, sucrose myristic acid ester, sucrose lauric acid ester, sucrose erucic acid ester, and sucrose oleic acid ester.
4. The adhesive patch according to any one of claims 1 to 3, wherein the adhesive base is a rubber base.
5. The adhesive patch according to claim 4, wherein the rubber base is one or more kinds selected from styrene-isoprene-styrene copolymer, polyisobutylene, and polyisoprene.
6. The adhesive patch according to claim 5, wherein the rubber base further contains polybutene.
7. The adhesive patch according to any one of claims 1 to 3, wherein the adhesive base is a water-soluble polymer.
